

Remarks/Arguments:

Amended drawing figures are submitted, herewith, as explained above.

Claims 57-75, previously presented, with claims 62, 67-69, 71, 72, 74, and 75 amended, hereby, are pending.

Claims 57-67, 70 and 73 stand allowed.

Claims 68, 69, 71, 72, 74, and 75 are objected to. Reconsideration of the objection is requested in view of the changes to the claims effected, hereby.

Antecedent basis, found lacking for recited text in each of claims 68 and 69, is established by changing the dependency of each of claims 68 and 69 to claim "65."

The objections to claims 71, 72, 74, and 75 are resolved by amending these claims, hereby, as helpfully suggested by the examiner. Applicants wish to thank the examiner for kindly suggesting alternative claim language to overcome the stated objections.

In that the objections to the claims are overcome as explained, above, claims 68, 69, 71, 72, 74 and 75 are, now, allowable.

Although claim 67 was not objected to, dependency of the claim is changed to claim "66," in order to effect proper antecedent basis for text recited in the claim. Claim 62 is also amended, hereby, to correct a clerical error – to recite "method according to claim 57."

The specification is amended to include a Brief Description of the Drawings, in accordance with the Examiner's helpful suggestion. Again, applicants wish to thank the Examiner for kindly suggesting how to overcome the objection to the specification in connection with the Brief Description of the Drawings.

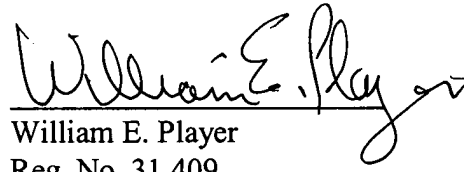

With respect to the other section headings set forth in the objection, the subject specification does not necessarily lend itself to include these other section headings; which, in any event, are only "preferable," MPEP 608.01(a), not required.

Favorable action is requested.

Respectfully submitted,

JACOBSON HOLMAN PLLC
